

FAIRY TALE OAK INSTALLATION

Congratulations on the purchase of your pedestal and sink. Your sink and pedestal will be assembled. Once your sink is in place attach a grid drain to your sink. We recommend the grid drain because there is no overflow for this sink. The grid will prevent the possibility of flooding unless the drain is plugged.

Turn pedestal into the proper position to run p-trap. Either anchor the pedestal to the floor with 2" wood screws or by running a clear adhesive silicon to the bottom of base. Silicon will not only help stabilize the pedestal but will prevent water from getting under the tree. Once the tree is anchored to the floor attach the p-trap.
